DONALD PIERCE

donpierce@nyu.edu | (+1) 248 977 0841 | donjpierce.github.io | 60 W 142ND ST APT 3C, New York, NY 10037

EDUCATION

New York University — New York, NY
B.A. Physics, B.A. Mathematics | Courant Institute — *September 2014 - May 2019*

- Treasurer of the Society of Physics Students *(2016-2017)*
- **Relevant Coursework:** Linear Algebra, Ordinary and Partial Differential Equations, Multivariate Calculus, Computational Modeling and Simulation, Combinatorics with Graph Theory, Probability Theory

RESEARCH EXPERIENCE

Center for European Nuclear Research (CERN) — New York, NY
Student Data Scientist in Experimental Particle Physics at ATLAS — *May 2016 - May 2019*

- Developed a novel method to optimize algorithm efficiency by weighting results from different algorithms
- The hybrid algorithm approach using bisection optimization was approved for testing and is currently in use in three data-collection chains at the Large Hadron Collider ATLAS experiment as of April 2018, filters TBs / sec
- Gave more than 12 talks presenting on algorithm efficiency, correlation between ATLAS algorithms, and hybrid algorithm approaches to the Missing Transverse Momentum (MET) Group at CERN
- Work has contributed to both the ATLAS 2017 PUB Note and the upcoming Run 2 Performance Note
- Used C++ with the ROOT Data Analysis Framework to design new data-collection algorithms
- Became an authorized CERN cloud user; compiled data into ROOT trees over globally-distributed Linux servers

WORK EXPERIENCE

Elementus, Inc. — New York, NY
Data Scientist — *July 2019 - October 2019*

- Wrote and published a comprehensive analysis of the PlusToken cryptocurrency scam, which later went viral
- Contributed to the company's core data analysis pipeline by designing cloud computing processes in SQL \ C++
- Worked with graph visualization software to tell stories with big data, used Node JS (functional programming)
- **References**: Max Galka (CEO) max@elementus.io Alex Robnett (Deployment Strategist) alex@elementus.io

Spheryx, Inc. — New York, NY
Scientific Research Intern — *May 2018 - August 2018*

- Designed algorithms which process large pandas data-frames and extract scientific plots for users
- Gave three talks presenting on new methods to profile nano-particle flows suspended in fluids
- Built a user-friendly web app using Dash by Plotly for scientists at the company to more easily process videos
- Studied potential applications of TensorFlow in company software, such as for learning particle type and position

SELECTED INDEPENDENT PROJECTS

Traffic — New York, NY
Machine Learning in Python available at github.com/donjpierce/traffic — *November 2018 - February 2019*

- Designed a reinforcement learning algorithm for my own simulation of traffic flow on real road networks
- Used Q-learning and ϵ-greedy techniques to allow cars to try alternate routes until shortest time is found
- Used TensorFlow and Keras to train a three-layer linear learning architecture

AWARDS

- **NYU DURF Grant** — Awarded $1,000 for "compelling and significant" research *November, 2017*

SKILLS & INTERESTS

- **Languages** Proficient in SQL, Python, Pandas, Scikit-Learn, NumPy, Node JS, C++, ROOT, Google Cloud Services, Google BigQuery; familiar with TensorFlow, Amazon Web Services (RDS, S3, Neptune, EC2), Gremlin, Jinja2, HTML; experienced with RESTful web apps, Git, Unix/Linux, Flask, Django, Mathematica, MATLAB

Python **C++** **Node JS**

- **Hobbies** Stargazing, playing jazz sax, writing philosophy, thinking about how to design the cities of the future
